

What can you do to help your child?

Davies Lane Primary uses a method of teaching called 'Synthetic Phonics' to help children learn to read and spell. We run parent workshops in order to support parents in helping their children at home. www.phonicsplay.co.uk is a great website with games for you to play with your child at home.

Counting objects, reading door numbers or searching for particular numbers or patterns on your way to school are great ways to support your child's everyday mathematical understanding.

Visit your local library and encourage your child to enjoy reading a range of fiction and non-fiction books. This will also support your child's writing skills.
